Good morning

As a software provider a lot of brokers come to us with questions.

Some are insisting every importer will need their own ASEC for CARM.

I do not believe this is the case, for at least the reason ASECs are only 5 digits long.

Can you please provide me clarity on this so I can share with my brokers?

I am looking through the CARM google drive but after a bit have not seen the document that addresses this.

Hello,

You are right , it is a misunderstanding related to the fact that all importers will need to have Financial Security linked to their Importer number, instead of an ASEC number.

More information on CBSA 's website, here [How the trade community can prepare \(cbsa-asfc.gc.ca\)](#) page, at [Key features of Release 2](#) you will find [Changes to the release prior to payment program](#).

Hoping this helps,

Yaël Lespinasse (elle/she) for
